BI reporting VBA

EDUCATION

Bachelor of Science in Computer Science

University of the Philippines
Metro Manila, Philippines · Jun 2009 — Jun 2015

CERTIFICATIONS

- Complete Data Science Bootcamp 2025 — Udemy
- Shopee Code League Hackathon — 2021

SUMMARY

Results-driven Senior Software Engineer & AI Engineer with 10+ years of experience building scalable software, leading high-performing engineering teams, and shipping data-driven applications. Full-stack, cloud, AI training workflows, and Agile delivery. Known for problem-solving, cross-functional leadership, and a consistent track record of shipping high-quality products.

EXPERIENCE

JINAE (Jennie Unnie Co. Ltd)

Auckland, New Zealand · Apr 2025 — Present

Founder · E-commerce Manager

Apr 2025 — Present

- Established and operate a growing Shopify retail store end-to-end: supplier sourcing, product selection, marketing, inventory, and customer service.
- Built and customized the storefront on Shopify, improving customer retention and sales growth.
- Configured shipping, taxes, payment gateways, apps, and integrations.
- Drive brand visibility and conversion through social media, SEO, and email campaigns.
- Set up and monitor Shopify analytics and the Google Ads / Analytics / Merchant / Search Console stack.
- Redesigned the store with AI assistance (Claude Code, OpenAI Codex).
- Automated bookkeeping workflows with AI assistance.

Luut Limited

New Zealand · Aug 2025 — Present

E-commerce Specialist

Aug 2025 — Present

- Built the e-commerce site on Shopify with custom theme work in Liquid, JavaScript, and CSS.
- Configured shipping, taxes, payment gateways, and integrations.
- Set up and monitor Shopify analytics + Google Ads / Analytics / Merchant / Search Console.
- Maintain the online catalog and coordinate product photos, descriptions, and campaigns.
- Redesign work with AI assistance (Claude Code, OpenAI Codex).

G2i Inc.

United States (remote) · Jul 2025 — Present

AI Software Engineer · Freelance

Jul 2025 — Present

- Build and design apps and websites with AI-assisted workflows (Claude Code, OpenAI Codex).
- Develop programs, test cases, and prompt scenarios to evaluate and refine LLM behavior across tasks — including Python data insights and visualizations.
- Apply prompt engineering techniques and structured workflows to test how LLMs respond to different instruction styles and data patterns.

- Softcon PH — 2019
- Python for Data Science — University of Michigan (2018)
- Oracle Certifications — PeopleSoft Student Financials, Academic Records, PeopleCode
- Various Data Science & Engineering Seminars — 2017–2023

Prolook (Qstrike Innovations Phils., OPC.)

United States (formerly Quickstrike Manufacturing Phils., Inc.) · Jul 2017 – Apr 2025

Associate Software Development Manager

Mar 2024 – Apr 2025

- Led a team of 40 software engineers, providing guidance, strategic direction, and mentorship.
- Owned resource allocation and capacity planning; drove hiring, mentoring, and coaching across engineering levels.
- Built and improved internal engineering processes, including code management and deployment.
- Owned reports' career development: goal-setting, 1:1s, and evaluations.
- Drove digital product development, tracked progress, and kept work aligned with organizational goals and engineering standards.
- Identified and mitigated risks, dependencies, and issues across the SDLC.
- Delivered critical project reporting and comms to senior stakeholders.

Senior Software Engineer

Feb 2022 – Feb 2024

- Led a team of 10 junior and mid-level developers and successfully launched projects.
- Led the Riddell customizer platform on SAP Hybris — a product that generated ~40% of company profit at the time.
- Built the customizer shopping cart and ordering system used by multiple brand clients.
- Led core and new-brand customizer projects (Core, Perfect Game, Alli, Quickturn Promo, Game One / Prevail, Prolook, Axe, Baden) as the key comms lead across cross-functional teams.

Data Scientist

Jul 2017 – Jan 2022

- Collected and cleaned data from databases, APIs, and web scraping.
- Built the company's Leaderboard sales dashboard in Python — data analytics and visualizations that surfaced insights for both management and clients.
- Developed and trained ML models for classification, regression, and clustering tasks.

OpenText, Inc.

Canada · Apr 2016 – May 2017

Associate Internal Business Systems Programmer/Analyst

Apr 2016 – May 2017

- Developed EDI inbound/outbound maps that converted data between formats and standards for B2B integrations.
- Ran system analysis against client requirements and unit-tested to ship defect-free releases.
- Only team member with zero SQA-issued bug tickets during code testing.

University of the Philippines System

Metro Manila, Philippines · Apr 2013 – Apr 2016

Systems Analyst

Jul 2014 – Apr 2016

- Owned data gathering, migrations, analysis, and configuration for the eUP Student Academic Information System (SAIS).
- Wrote MySQL/BI Publisher reports for the student module system.
- Delivered end-user training to staff across UP campus units.

Software Developer Intern (UP ITDC)

Apr 2013 – May 2013

- Front-end (HTML/CSS/JavaScript) for the CHED Research Information System.
- Contributed to website revisions and technical documentation.
